

# Get the Flu Shot, Not the Flu

The flu shot protects you from different types of flu for the entire flu season.

- **Keep your family healthy.**  
*It will prevent you from spreading the flu virus to your family members.*
- **Stay healthy for work and school.**  
*Flu symptoms, like fever and weakness, often keep you at home and unable to go to work or school.*
- **The flu virus changes every year.**  
*Since the flu virus changes every year, you need a new shot each year to stay healthy.*
- **It's low-cost.**  
*Your insurance pays 100% for flu shots.  
If you do not have insurance, come to our free flu shot event.*
