

FREE FLU SHOT EVENT

Get the Flu Shot, Not the Flu

The flu shot protects you from different types of flu for the entire flu season.

- **Keep your family healthy.**

It will prevent you from spreading the flu virus to your family members.

- **Stay healthy for work and school.**

Flu symptoms, like fever and weakness, often keep you at home and unable to go to work or school.

- **The flu virus changes every year.**

Since the flu virus changes every year, you need a new shot each year to stay healthy.

- **It's free.***

If you do not have insurance, come to our free flu shot event.

** A free flu shot is available for uninsured adults 19 years and older. Please bring photo ID to prove age.*
